

LSCS – SW – DVD02 Table of Contents

Introduction

Glenn Richards has compiled about 4.4± GB of freeware, all of his weekly email newsletters, and considerable other materials on one DVD disc named LSCS-SW-DVD02.

This was a tremendous undertaking for Glenn and the LSCS is most grateful for his efforts.

Contained on the following 26 pages is the Table of Contents of this DVD.

Since it is in pdf format you may use either the Adobe Reader Search command or the Edit – Find utility to look for any specific freeware programs or other contents of the DVD. I don't know how other pdf readers will read this file.

As to the best way to find what is on DVD itself here is what Glenn says:
“Whenever I want to find something on the DVD (I have a copy of its contents on a hard drive) I use the Windows Search feature to look for it, either by title words or by words contained in a file. This process searches inside zip files. The attached file [actually this file minus this introduction] amounts to a Table of Contents. With so many programs on the DVD it would be hard to explain to members how they might want to use them. In my view, they need to browse the files themselves and read the explanations.”

Keep in mind this is only a listing of the contents of the DVD. To get the actual program itself you will need either the DVD or you may download the freeware-software itself if you wish via the internet (enter the name of the program into Google to get an address).

This ToC is, however, an extremely valuable listing of almost every type of freeware one might wish to obtain.

So what follows is a listing of the contents of LSCS-SW-DVD02 for your searching or browsing. TJT 1/2/2007
